REDUCED WORKLOAD. INCREASED EFFICIENCY. To maximize efficiency and safety, the Hawker 750's panel is one of the cleanest and most logically arranged of any business jet — regardless of price. A fully integrated Rockwell Collins Pro Line 21™ avionics suite is highlighted by four 8- by 10-inch liquid crystal displays. The Pro Line 21 suite complements the large displays with an array of functions and capabilities that reduces pilot workload.

THE LARGEST, MOST COMFORTABLE CABIN IN ITS CLASS. The Hawker 750's cabin is taller, wider and longer and provides 30 percent more volume than that of its closest competitor. That added volume translates into more headroom, more legroom and greater all-around comfort for each passenger.
