

# WE ARE HIRING

## SNR LICENCED HELICOPTER ENGINEER

Please note this advertisement is open to Internal and External applications. National Airways Corporation invites applications from a highly skilled and safety-conscious Aircraft Maintenance Engineer to join our proactive, close-knit maintenance team. If you are a self-disciplined professional looking to apply precision and expertise to a diverse fleet of rotorcraft, we encourage you to apply via the link below.

**Date Posted: 29 January 2026**

**Closing Date: 3 February 2026**

### Essential Technical Requirements:

The successful candidate must be a Certified and Qualified Helicopter Maintenance Engineer with a valid license on the following specific helicopter types:

- Bell 206 (Jet Ranger / Long Ranger)
- Bell 407
- Robinson R44

### Core Experience and Education:

- Experience: Minimum of five (5) years of relevant Aviation Maintenance experience.
- Education: Grade 12 / Matric Certificate.
- Communication: Adequate proficiency in verbal and written English.
- Technical Literacy: Computer literate (able to use maintenance software and record-keeping systems).
- Mobility (Preferable): Valid driver's license and own reliable transport.
- Desirable: Experience holding Category B and/or Category C Certifications is highly regarded.

If you do not receive feedback within 14 days of the advertisement's closing date, please consider your application unsuccessful.

- **Position : Senior Licenced Helicopter Engineer**
- **Department: Helicopter Maintenance**
- **Location : Rand Airport**
- **Reporting to: General/Accountable Manager Helicopter Maintenance**

### Operational Commitments:

*The role requires flexibility to meet operational demands:*

- Willingness to work overtime as required, sometimes at short notice.
- Flexibility to travel locally or internationally for maintenance assignments when needed.
- Ability to maintain a clean, organized, and orderly work environment at all times.
- Must hold valid, up-to-date travel documents (passport, police clearance certificate, yellow fever card) at the time of application.

### Required Professional & Personal Attributes:

- We are looking for an individual who embodies our safety culture and operational excellence.
- Safety & Compliance: Consistently operates with a safety-first mindset, demonstrating precision, accuracy, and caution in all tasks.
- Problem Solver: Approaches complex technical issues impartially and objectively, with a strong practical focus and exceptional attention to detail.
- Teamwork & Autonomy: Functions effectively as a collaborative team player while maintaining the self-discipline and ability to work independently when required.
- Accountability: Takes full ownership of all actions and decisions.
- Professionalism: Communicates with team members, management, and clients in a professional, tactful, and diplomatic manner.
- Flexibility: Adaptable to new situations, receptive to unexpected circumstances, and able to maintain productivity under pressure.
